Comments Details

Commenter Type:	Neighbour
Stance:	Customer made comments in support of the Planning Application
Reasons for comment:	
Comments:	As an immediate neighbour of the property, I support these plans. The plans seem to be sensible improvements to the building and are in keeping with its character. We have not noticed any disturbance or traffic from the business and would not expect a partial residential conversion to change this. As a business owner and recently a home owner, I am generally in favour of increasing housing and supporting businesses in town.

Kind regards
